	Percentage: 80

Work Experience

May 2020 — Jun 2023	Online Services-AM - AT&T INC.
	Application Developer
	• Made sure to proactively monitor and in case of anomaly made sure to create outage to avoid customer impact and business SLA. • Made sure necessary escalations are happening whenever required to update clients/leadership on time. • Had created a chat bot which can help users with multiple functionality like finding business impact, CR details, team pocs, outage details etc. Same functionality was implemented on teams group as well using keyword function so that user can post particular keywords in teams group go get necessary details.

- Had created multiple dashboards across different platforms like Splunk, ELK, Quantom metrics, Dynatrace etc to make the monitoring easy, efficient and proactive to team members/users.
- Had worked on patching nearly 900 servers twice a year to make the server compliant w.r.t. business SLA.
- Had worked on major/minor release activities where server restart, new content pushing was needed.
- Made sure to share the knowledge with the team members to avoid any lag in the teamwork.

Jul 2023 — Present

Molsoncoors Brewery Company

Site Reliability Engineering (SRE)

- On-boarded 10+ Accenture-owned Splunk-based applications for seamless monitoring.
- Developed custom Splunk apps automating IBM batch job monitoring, reducing manual effort by 50%.
- Automated incident workflows via Power Automate, cutting response time by 40%.
- Created shell scripts to monitor SAP Hana DB, enabling automatic incident handling.
- Built Python scripts for automated incident resolution for repetitive failures.
- Extracted ServiceNow incident data into Splunk for advanced analytics.
- Designed 100+ saved searches, macros, data models to tailor data views.
- Built 50+ dashboards for real-time system monitoring.
- Resolved Splunk licensing issues through data optimization strategies.
- Developed a Teams-integrated chatbot for real-time Splunk data access.
- Led integration of Splunk, Power Automate, and RPA to automate host restarts, minimizing downtime

Certification

Jun 2020

AZ-900: Microsoft Azure Fundamentals - Microsoft
